SUMMARY

This is a report of forest production in Nova Scotia for the calendar year 1990, based on data collected by the Operations Branch of the Department of Natural Resources. Compiling, editing, publishing and distribution were done by the Forestry Branch, Forest Resources Planning and Mensuration Division.

The information was collected from producers, processors and buyers of primary forest products. Sawmill firms reported the quantities sawn during the calendar year 1990, whether the wood was purchased, custom-sawn or produced by the mill owners themselves. Roundwood production was obtained from buyers and producers of pulpwood, pit-props, veneer logs and poles and piling. Pit props are included with poles and pilings for aggregation reasons.

Production data are concerned only with wood of Nova Scotia origin. Export wood is included. (See Table 1 Below)

Production is shown as accurately as possible by county of origin. Resawn volumes are omitted to eliminate duplication of data.

The total commercial production, at roundwood level, amounted to 145,352,445 cu.ft. (4 115 919 m^3), solid wood equivalent, up 5.2% from 1989. Sawlog volume increased by 4.9% from 1989, amounting to 42,130,790 cu.ft. (1 193 010m^3) equivalent. Round products increased 5.3% to 2 922 909 m^3 equivalent.

Compared to 1989, increases were reported for softwood lumber, softwood pulpwood, hardwood lumber, hardwood pulpwood, softwood boxwood, softwood railway ties, hardwood railway ties, all mine packs, all laths, softwood shingles, softwood staves & headings, and all residue and whole tree chips. All other products had decreased in production from 1989.

The pulp and paper segment of the industry is composed of five mills: a kraft pulpmill at Abercrombie Point; a sulphite pulpmill and newsprint mill at Point Tupper; a newsprint mill at Brooklyn; a paperboard mill at Hantsport and a hardboard plant at East River.

From 1989 to 1990 the total number of firms operating all types of sawmills decreased by 22 to 341.

The number of firms producing over one million board feet during 1990 was 40, same as 1989. There were 264 firms producing less than one million board feet per firm, compared to 292 in 1989.

Of the smaller producers, 203 produced 100 Mfbm or less in 1990.

Firms producing over one million board feet per firm accounted for 14% of the number of firms and produced 89% of the lumber and boxwood.

As in previous years, fuelwood - whether in sawmill chip form or stacked - is not reported. Since 1983 whole tree chips have been reported, however, they are for all species and all diameters and are not included in any summary figures.

SUMMARY OF PRODUCER BY TYPE OF SAWN PRODUCT

NOVA SCOTIA - 1990

	1989	1990
Firms producing lumber only	290	258
Firms producing boxwood only	7	3
Firms producing ties only	0	0
Firms producing mine packs only	3	3
Firms producing laths only	20	24
Firms producing shingles only	5	6
Firms producing staves & headings only	2	3
Sub Total	327	296
Firms producing more than one product	36	45
Total No. of Firms	363	341

See "List of Sawmill Owners and Materials Produced - 1990" for further information.

Production statistics by ownership class are included in this publication. Provincial Crown production was obtained from records kept by Department of Lands and Forests. Large Private owners provided data for private ownerships of over 1,000 acres (400 ha) per owner. Small Private ownership production was estimated by subtraction of Crown and Large Private production from the total provided by sawmill and roundwood producers.
